

ENGG 1003 Sustainable Engineering Practice

The authoryear-unisa biblatex Style

Demonstration and Test Cases

Philip Shaw

18 April 2018

Abstract

This bibliography style has been developed solely to meet the demands of the UniSA-Harvard referencing system as laid out in the January 2017 edition of the *Harvard Referencing Guide UniSA*. It is not intended to be configurable, and as \LaTeX code it is pretty hacky, but aside from the caveats noted in marginal comments it appears to meet the reference requirements for those formats which are implemented.

Citations are not yet working correctly.

This document is both an example of the use of the reference style (allowing comparison to the official specification), and a set of test cases for semi-manual regression testing.

It requires e- \TeX , that is, almost any modern \TeX engine. It has been tested in Xe \LaTeX and PDF \LaTeX . It also requires an MD5 command, and if it isn't called `\mdfivesum` or `\pdfmdfivesum` you'll need to add `\let\mdfivesum\yourmdfivesum` to your preamble.

Disclaimer

The `biblatex` BBX code is principally my own work, although it draws from the examples given in the `biblatex` documentation and elsewhere. The sample text is drawn almost verbatim from *Harvard Referencing Guide UniSA*. The CBX code is as-yet largely from `biblatex`.

1 Usage

To produce your bibliography, you need to run latex, then biber, then latex, just like when using bibtex. For example:

```
xelatex your_file  
biber your_file  
xelatex your_file
```

2 An extract from an essay using the Harvard referencing system

[...] The literal adaptation of a book to film is practically impossible. As Stam (2005a, p. 4) suggests:

The shift from a single-track verbal medium such as the novel to a multi-track medium like film, which can play not only with words (written and spoken) but also with music, sound effects, and moving photographic images, explains the unlikelihood and [...] undesirability of literal fidelity.

It is puzzling, then, that readers and audiences are so critical of adaptations which take liberties, sometimes for the better, with their source material.

Film adaptations of novels are frequently ‘castigated and held to an absurdly rigorous standard of fidelity’ (Stam 2005b, p. 15). If key scenes from a novel are pruned for film, audiences often react negatively. However, fidelity is not an appropriate measure for evaluating a film adaptation’s success, as numerous scholars concur (Desmond & Hawkes 2006; Leitch 2008; McFarlane 1996; Miller & Stam 2004). Judging film adaptations is ultimately, Whelehan (1999, p. 9) contends, ‘an inexact science dogged by value judgments about the relative artistic worth of literature and film’. A fan of a novel might denigrate a film adaptation which alters the original book in some fashion, but their response is highly subjective and fails to take into account the practices and realities of film production (McFarlane 2007, p. 26).

Sometimes there are grounds for hostility. Author Alan Moore has witnessed a number of his complex graphic novels adapted into shallow Hollywood products, making him extremely critical of filmmakers and the filmmaking process (Ashurst 2009). However, this kind of attitude can be knee-jerk and reactionary. Rather than being overly pedantic about textual faithfulness, it is best to approach film adaptations as re-interpretations of their source material (Hutcheon 2006, p. 8) or as ‘a permutation of text, an intertextuality’ (Kristeva cited in Sanders 2006). Moreover, new modes of production further complicate existing definitions of, and approaches to, adaptation (Moore 2010, p. 180). So[...]

4.8 Streaming audio and video

I have used the @Audio, @Video, @Movie, and @Music, types (all aliased together) for recordings and streaming. Use the type field to indicate the format (that seemed the most appropriate and least likely to clash with any other sensible use, and was suggested by the `biblatex` manual), although I may change to using something else instead if this proves problematic. Howpublished is used for the free-text platform information etc. I am considering using Eprint and friends to hold video IDs, but for now that’s too much work for the number of platforms that would need supporting to be useful.

Podcast [...]identified as his strongest works (McWeeny & Weinberg 2010).

Streamed video (e.g. YouTube clip) A short video by the University of Mississippi Libraries (2015) explains[...]
..is discouraged (University of Mississippi Libraries 2015).

Streaming video accessed via UniSA Library

Note. I am assuming that the missing year in the seven news example reference is erroneous.

[...]‘apologised for his company’s role in the debacle’ SevenNews

Note. ‘(dir.)’ is appened if and only if the last author has a given name. This is a dirty kludge, but I can’t think of a better way to distinguish between corporate authors and directors. It would be more elegant to put directors in an editor list and set the editorXrole to a suitable value, but it appears to be convention to stick the director (rather than the writer, say) in the author list so that’s what I’ve gone with.

TO DO:
Confirm
this.

Note. I am assuming the use of month-day date format in the example is an error.
